Fruitland Site Bulletin 062616 DRAFT FINAL.docx

I have done some additional edits. Please review this version. Redline included. Hard copy will be routed.

Thanks,

Michelle Rogow

Subject: Draft FINAL: Fruitland Site Bulletin

Hello IC's,

Just finished merging comments and edits to the Fruitland Site Bulletin. Hoping you can all take a couple of minutes and take one last look (In track changes) or I can also print you out a copy first thing in the AM and get this out into the world.

There are just 3 small outstanding needs I've identified for this:

- 1) What day did the DPH Public Health Officer issue the north side evacuations? I've been tipped off that Planning knows the date, and may be in one of our historic daily reports. I will check in with them in the AM.
- 2) On June 22nd, it mentions an assessment of damage to utility poles and equipment was conducted? I could not confirm this, hoping someone may have more details and can confirm exactly what happened and by whom? In the meantime, I have kept this out.
- 3) Our most approximate metric on the last page is temporary relocated residents. It may take some time to calculate these numbers every day. Especially when homes start moving in,

because someone will have to calculate the number moved back. Let me know what you all think.

Thanks so much in advance, we are so close.
